

Palletways in control of deliveries for He-Man Dual Controls and World Options

Background

He-Man Dual Controls Ltd is the UK's largest and most respected manufacturer of dual controls, predominantly for the driving industry. It offers a range of dual control systems for different kinds of vehicles, including left-handed, automatic and hybrid. With all its products being manufactured in Southampton, He-Man Dual Controls Ltd ensures safer roads worldwide with a solid market in Europe and the UK.

The brief

He-Man Dual Controls Ltd needed a reliable pallet service provider offering competitive rates.

Our solution

Shipping with World Options, which has been a Palletways UK corporate sales customer for 10 years, allows He-Man Dual Controls Ltd to get the best rates from various carriers and a dedicated account manager to take care of all its shipping queries. For their UK domestic pallet shipments, Palletways was an ideal solution. Especially beneficial is Palletways' tracking service in combination with reliable delivery.

"The tracking service, for me personally, is clear and updated regularly. They deliver when they say they will, and sometimes earlier than expected.", says Kerry Lacey, Logistic Coordinator at He-Man Dual Controls Ltd.

Whilst working with World Options and Palletways, He-Man's UK shipping has increased significantly and is expected to increase further. With customers worldwide, He-Man Dual Controls Ltd is looking to further increase its European and international markets.
